The “Climate Future - Cool It” committee of the Community Environment Network (CEN) is organizing a forum about Climate Change.

What can we do to react to the threat of Climate Change? ... Come along and discuss our future!

Dr Richard Corkish from NSW University has been involved in development of photovoltaic cells and research into the electrical efficiency of silicon wafers.

Dr Adam Lucas has recently been involved in the “Beyond Zero Emissions” project which had its launch recently in Sydney.

Following a short roundup of the impacts of climate change on the Central Coast, an interactive session will be held where participants will have the chance to have their say and get expert advice from the panel.

Climate Future thanks Gosford City Council for its support in running this Forum.
